Psychedelic Research

We Offer

Delivery of complex trials across all study phases.

Manufacturing (fully certified MIA (IMP) MHRA facility) and distribution of all classes of controlled substances with shipment globally (same day within the UK). MAC has 8 facilities with Schedule 1 licences.

Patient engagement expertise in major depressive disorder (MDD), and post-traumatic stress disorder (PTSD) as well as extensive experience in psychedelic studies amongst healthy volunteers.

Experience in psilocybin, IV psilocin, ibogaine, DMT and deuterated psychedelics.

An environment dedicated and conducive to experiencing a safe, relaxed psychoactive experience:

- Private rooms aligned with psychedelic/hallucinogenic research to minimise acute psychological distress.
- Psychiatrists and therapists certified to provide psychedelic treatments and monitor patients for psychological distress throughout the experience.

Our Expertise

Specialised research facilities for psychedelic testing including overnight capabilities.

Experienced research staff fully trained in psychedelic studies.

First-ever clinical research company to administer high doses of psychedelics.

First company to administer ibogaine by IV in a clinical research setting in the UK.
